Hey Noodle,

As a jar containing 10 moles of gas A is heated the velocity of the gas molecules increases and a second gas B is formed. When 2 molecules of gas A collide, two molecules of gas B are formed. The rate dy/dt at which gas B is formed is proportional to $(10-y)^2$, the number of pairs of molecules of gas A. Find a formula for y if y = 2 moles after 30 seconds.

Dearest Noodle-mister,

I have been made aware of your infinite knowledge by many of the members of our excellent student body here at Waycross College. My question is something of intrest to everyone who has ever taken a course at this institution:

"Why do the Professors here have the same wardrobe as Greg Brady?!"

Sincerely,

I have some what to ~~say~~ SAy CONCERNING One Professor Weeble-Wobble whos name will be ~~whos~~ we'll not mention because I'm still in his/her class. His partial, fashist, Athoritative dictatorship of our class has driven me to Lash out in Editorial form. What ever happend to Instructors who are unpartial, unsexist, and unbiased? Does this emotionless, egg-headed, Swapper turtle nosed Hitler clone not remember that he also was a student at one time? He/She probably can't remember because it was back when His/Her waistline was a 35, and who would have thought that Huggie's makes A 35" diaper! Well, It might be ~~that~~ I'm asking too much of A child raised by A mother who has AN Afro with A chin strap, but just show A little unpartiality.

Signed,
disgusted

Nude, (I am well aware of the correct spelling of "Noodle")

Explain why one pays almost $400 per quarter for college & they can't seem to afford to give one, notibly me, free refills. Is that asking so much!

Also why is an A - 4.0 regardless (90-100)
B - 3.0 regardless (80-89)
C - 2.0 regardless (70-79)

Shouldn't there be 2.5 - (75-79)
or 3.5 - (85-89)

P.S. I use Klein Tools every single day, I've been coveting your bag.
